

100% GATED SECURITY

# SECURED CLINICAL ONBOARDING SHIELD

## HIPAA WAIVER GATE MODAL

Access to the clinical scribe dashboard is strictly gated until the licensed provider signs and covenants to direct diagnostic responsibility and malpractice liability under HIPAA administrative rules. Bypasses passive vendor custody.

SECURED CLINICAL ONBOARDING SHIELD

ZERO-RETENTION STORAGE

# INDEXEDDB LOCAL CLIENT REGISTRY

## DE-IDENTIFIED BROWSER CONTAINMENT

Generate anonymous client profile metrics, treatment baselines, and symptom metrics locally inside your browser's IndexedDB. No patient identifying data is ever submitted to remote cloud database tables, bypassing cloud residency leak vectors entirely.

INDEXEDDB LOCAL CLIENT REGISTRY

FUNCTIONAL EQUIVALENCE

# AMBIENT CLINICAL TELEHEALTH SESSION

## UNIVERSAL MULTI-MODAL INTAKE SANDBOX

Capture telehealth dialogue, ambient in-person audio, or post-session dictation into standard frameworks (SOAP, DAP, BIRP) with complete custom clinical template capability. Supports 9+ major dialects.

AMBIENT CLINICAL TELEHEALTH SESSION

AUDIT-READY COMPLIANT

# EPHEMERAL NOTE SYNTHESIS

## VERTEX AI HIPAA BAA PIPELINE

Synthesized clinical text is processed ephemerally in-memory through Vertex AI. Once the compiled note is returned, data is instantly flushed from server memory, leaving zero residual cloud footprint. Includes clinician attestation signatures.

 EPHEMERAL NOTE SYNTHESIS
